About Me

Hi 👋,
I'm a passionate software developer specializing in web and mobile application development. I always strive to keep myself up-to-date, focusing on learning and implementing new technologies and trends in this rapidly evolving industry. My problem-solving abilities, communication skills, and teamwork capabilities extend beyond just coding, making me a collaborative and quick-learning professional. I take pleasure in using the power of software to create better experiences for people and continuing to bring projects to life.

Education

2018-2022
Antalya Bilim University
Computer Engineering

Clubs and Events

Actively participated in ABU Code Club, contributing to various projects and enhancing software development and programming skills.
Collaborated with GDG Antalya to attend the Akdeniz Bilişim Zirvesi, networking with tech industry experts and staying updated on emerging technologies.
Co-organized informative events at Akdeniz University to guide students in technology and software development, developing communication and leadership skills.
Actively participated in the Cybersecurity Club, organizing events to raise awareness and enhance cybersecurity skills.
Organized and participated in practical cybersecurity training sessions at the university, improving cybersecurity expertise.

Projects

Project Link : youtube.com/watch?v=MhQ9RFXfSWME&t=3s

Graduation Project

Monark is a mobile application for creating an efficient and enjoyable route while traveling.

Nakliye Bul Getir

In my involvement with the 'Nakliye Bul Getir' project, I contributed to the development of a platform that offers customers seamless access to available trucks while simultaneously empowering truck drivers to easily locate cargo opportunities at their desired time and location.

Project Link : play.google.com/store/apps/details?id=org.vibit

Vibit

Vibit Nova is a revolutionary smart wristband that simplifies language learning by using vibrations to directly stimulate your brain, allowing for hands-free, eyes-free, and ears-free information absorption.

Experience

06/2022 - 07/2023
Aksungur Software

Frontend Developer

Contributed to mobile and web app development on various platforms.
Helped build efficient client file management infrastructure.
Committed to industry best practices for reliable, high-quality software products.

01/2022 - 02/2022
Avium Tours

Frontend Developer

Developed a React-based frontend and .NET Core backend for a comprehensive cargo tracking system.
Implemented secure user authentication for accessing cargo information, including real-time tracking.
Designed a user-friendly interface for easy cargo management.
Empowered administrators with complete system oversight and management, ensuring data security.

06/2021 - 09/2021
Hotech

Frontend Developer

Customized websites for various hotels, including boutique resorts, reflecting their unique style.
Modernized invoice designs for improved professionalism and readability.
Collaborated closely with hotel owners to capture their website vision.
Utilized the latest web design trends for user-friendly, responsive sites.
